MUNICIPAL INFORMATION DOCUMENT
ON **MAJOR RISK**

City of **Le Val-de-Dagne**
2026

Ladies and Gentlemen,

To anticipate potential major risks, the municipality is taking action to ensure your safety and the protection of your property by implementing a Municipal Emergency Plan (PCS). The unique characteristics of our municipality have led to the establishment of two systems tailored to each of our villages, under the coordination of the Mayor.

Two groups of trained elected officials will be formed, adhering to the safety guidelines that will be defined. In the event of a power outage, and whenever possible, each elected official will be responsible for directly informing the residents of their assigned area.

A public meeting to present the PCS will be held on **Monday, June 8, 2026, at 6:30 p.m.** at the Grand Foyer in Montlaur. We hope to see many of you there.

We are pleased to provide you with this Municipal Information Document on Major Risks (DICRIM), which details the identified risks within the municipality, the procedures to follow, the means of alerting authorities, as well as safety instructions and emergency numbers.

To improve the responsiveness of alerts, it is important that the municipality has your contact information (mobile phone number and email address). Please find the form on the following page.

You can also download the free PanneauPocket app to receive municipal information and alerts in real time.

Thank you for your attention and your commitment to everyone's safety.

Claude LACUBE
The Mayor of Val-de-Dagne

FLOODS

BEFORE

- Move furniture and valuable items to safety
- Block doors and windows, tether heating oil tanks
- Remove vehicles parked near riverbanks

DURING

- Don't try to meet close friends and family or collect your children from school, don't drive, postpone your journeys
- Stay informed and listen out for guidance from the authorities in the media, social networks and official websites
- Check on family members, neighbours and vulnerable people
- Shelter on higher ground, don't access basement car parks
- Don't go out on flooded roads by car or on foot

AFTER

- Keep up to date with any changes in the situation
- Air and disinfect rooms in your house
- Turn the heating on as soon as possible
- Don't switch the electricity back on until the system is dry
- Notify your insurance company about the flood as soon as possible

WILDFIRES

BEFORE

- Clear undergrowth from around your house
- Clear gutters where dead leaves can collect

AFTER

- Leave your house wearing protective clothing (leather shoes and gloves, cotton clothes and a hat), inspect your house and watch embers, extinguish any remaining flames without taking unnecessary risks
- Notify your insurance company about the fire as soon as possible

IF YOU SEE A FIRE START

- Call the fire brigade immediately
- If possible, try to contain the fire breathing through a wet cloth or piece of fabric

A PROTECTED HOUSE IS THE BEST FORM OF SHELTER

- Close and hose down shutters, doors and windows
- Block air vents with wet cloths and towels

IN THE COUNTRYSIDE

- Get away from the fire and smoke as soon as possible
- Don't get out of your car
- Switch off any gas or electrical appliances or devices

5

SUBSIDENCE

Keep away from buildings

Evacuate buildings

Follow safety guidance

CAVE-IN

Shelter under furniture (table)

Evacuate buildings

Switch off gas and electricity

Find a safe place

HEALTH RISKS

Definition

A health risk is an immediate or long-term hazard that constitutes a direct threat to public health.

It involves the effects on health after human or animal exposure to a source of contamination requiring a specific response tailored to the health system. The health risk therefore depends on the type of contaminant, how toxic it is, as well as the duration and level of exposure.

COVID 19

Covid-19 stems from the SARS-CoV2 virus and is a new coronavirus first identified in China in December 2019. The virus can cause severe illness (breathing difficulties, intense fatigue, fever, etc.) and is even more dangerous as it is contagious. Without protective measures, each person infected can transmit the virus to at least 3 other people even if they feel no symptoms.

Preventive health measures can be applied to curb the spread of the virus in a particular area (closure of places where people congregate, restrictions on movements, lockdowns, wearing masks and social distancing).

Mass vaccination campaigns will also be implemented.

What to do in the event of a public health risk ?

- Listen to public authority guidance which can change according to the situation
- Adopt the simple, recommended steps
- Follow any eventual specific rules on the movement of people or animals
- If symptoms appear, contact your doctor or call 15

WEATHER EVENTS

SNOW, ICE, HEATWAVES, THUNDERSTORMS, EXTREME COLD, HIGH WINDS

SNOW / ICE

- Limit any journeys and don't take risks
- Obey traffic restrictions and follow diversions
- Give way to snow ploughs
- Clear snow and salt footpaths in front of your house
- Don't touch fallen power lines

THUNDERSTORMS

- Don't shelter under trees
- If in a car, stay inside and quickly park in a safe, unexposed area, switch off the engine and don't touch any metal parts
- Don't travel or go for a walks in the forest or mountains
- Alert the fire brigade immediately if you see a fire start

EXTREME COLD

- Wear warm clothes and remove any wet items
- Air your home once a day
- Call 115 if you see anyone in need of help
- Stay in touch with vulnerable friends or family members

HEATWAVES

- Limit any journeys
- If you do go out, wear a hat and light-coloured, loose (cotton) clothes
- Keep windows shut when outside temperatures are higher than indoors. Open them at night to allow air to circulate. Half-close shutters and blinds facing the sun
- Take refuge in a cool spot for at least 2-hours a day
- Drink as much as possible, even when you're not thirsty. Avoid alcohol as this exacerbates dehydration
- Check on close family or friends who live on their own, are vulnerable or dependent on assistance and help them to eat and drink.

HIGH WINDS

BEFORE

- Store or tie down objects likely to blow away
- Shelter in a permanent building, closing doors and shutters

DURING

- Don't go outside under any circumstances
- Unplug electrical appliances and devices

AFTER

- Repair what can easily be reinstated (especially roofs)
- Watch out for fallen power and telephone lines and trip hazards (chimneys, roofs, poles and posts, etc.)
- Cut down branches and trees that may fall

Risk management measures

Météo France's **weather warning map** is updated at least twice a day (at 6 am and 4 pm), or more frequently as weather events change. It informs the population about a possible dangerous weather event within 24-hours. Radio, television and internet relay information when the two highest levels are reached (orange and red).

The weather warning map covers the following events: high winds, high waves and storm surges, rainfall and flooding, thunderstorms, snow and ice, avalanches, heatwaves, and extreme cold.

Specific protective measures can be triggered via the ORSEC Plan for extreme cold or heatwaves.

warning map for
further information :

RAINFALL-FLOODING

the 8 actions to take

in the event of heavy Mediterranean rainfall

Stay informed
and listen to the authorities' instructions in the media and on social networks by following the official accounts

Do not go out in your car and postpone any journeys

Keep an eye on loved ones,
neighbours and vulnerable people

Keep away from waterways
keep clear of riverbanks and bridges

Do not go out
Take shelter in a building. Do not take shelter beneath a tree due to the risk of lightning

Don't go down into the basement, take shelter above ground, high up

FLOODED ROAD

Do not go anywhere in your vehicle or on foot

Submersible bridge, ford, underpass... Less than 30cm of water is enough for a car to be swept away

Don't go and pick up your children from school,
they are safe there
